

Novox NC1 Black USB Condenser Microphone

The Novox NC1 Black is a high-quality USB condenser microphone designed for podcasting, web streaming, and gaming, as well as voice and music recording. With its modern design and high quality components, it delivers great performance and crystal clear sound with easy, no hassle operation.

The NC1 Black's high sensitivity makes it a great tool for recording vocals, solo instruments, or even an entire band. Its cardioid polar pattern is designed to pick up sounds in front of the mic and reject sounds from the back and sides, dramatically reducing unwanted noise and other sounds you don't want in your recordings.

The Novox NC1 Black microphone's integrated analog-to-digital converter delivers professional 48 kHz, 16-bit A-to-D conversion, and with a frequency range from 30 Hz to 18 kHz, it's an ideal choice for any sound source. It is equipped with a rugged, heavy duty housing, and easily installs on a tripod stand, boom, or desk mount arm for maximum convenience and versatility.

The Novox NC1 Black USB microphone is designed to be fully plug-and-play, compatible with Windows, MacOS, and game consoles equipped with USB input – no need for expensive and complicated audio interfaces – making Novox NC1 Black a fully self-contained recording solution.

The Novox NC1 is available in two color options: elegant black (NC1 Black) and classic silver (NC1 Silver). There is also a special version designed specifically for gamers - the Novox NC1 Game.

Bullet points:

- High quality condenser microphone with crystal clear sound and very high signal level – ideal for podcasting, web streaming, and gaming, as well as voice and music recording.
- Seamless Plug & Play connectivity with Windows, MacOS, and USB equipped game consoles – no need for driver installation or expensive audio interfaces. Ready to use within seconds from connecting to your device via USB.
- Optional dedicated accessories such as a tripod table stand, movable boom arm, pop filter or special anti-shock handles enable you to use Novox NC1 Silver in virtually any setting.
- Ultra-wide 30 Hz to 18 kHz bandwidth and 48 kHz/16-bit A/D converter guarantee a clear and dynamic reproduction of the captured signal – both voice and music.
- USB cable and a standard microphone stand mount included.
