

Novox NVX12 Active Bluetooth Speaker

The Novox NVX12 Active Bluetooth speaker is the perfect portable powered solution for any application that requires dynamic, full-spectrum sound at an excellent price. With its big power and small size, the Novox NVX12 is an excellent choice for performers, mobile DJs, small clubs, restaurants, weddings, events, presentations and training sessions, as well as for schools or rehearsal rooms.

The Novox NVX12 Active Bluetooth speaker is packed with features to deliver maximum performance. Its 12 inch low frequency woofer, 1 inch high frequency tweeter, and integrated 700 W (peak) amplifier deliver the power, performance, and crystal clear sound you need for today's applications.

The NVX12's integrated mixer features two microphone/line inputs with independent level controls and input mode switches, eliminating the need for an external mixer. An additional AUX input, also with its own dedicated level control, is provided for connecting external line level devices such as MP3 or CD players. Bass and Treble controls allow for adjusting the system tone.

With its unique trapezoidal design, the Novox NVX12 can be used as a free standing PA system or as a high performance active stage monitor. The XLR line output enables you to connect a second active loudspeaker to create a larger PA or monitor system.

The NVX12 is Bluetooth enabled, allowing you to wirelessly stream music from any Bluetooth-equipped smartphone or tablet, as well as wirelessly pair a second NVX12 unit for dual operation.

The NVX12's rugged, road-worthy housing is made to withstand the rigors of regular use, giving you long-lasting trouble-free operation even in the most challenging conditions. Its lightweight design, ergonomical handles, and compact size mean easy transport and quick setup anywhere. A standard mounting hole allows for easy placement on any column tripod.

Bullet points:

- Versatile, active speaker cabinet with full featured mixer and powerful 700 W amplifier for full, rich sound and powerful performance.
- Built-in mixer with microphone/line inputs allows for connecting instruments, dynamic microphones or other musical devices without the need for an external mixer.
- Bluetooth connectivity to wirelessly stream music from any smartphone or tablet or pair with a second NVX12 unit.
- Lightweight, rugged cabinet for easy transport and durable, long range performance
- Can be used as the main PA system or as a stage monitor, making it a perfect choice for mobile DJs, touring bands, clubs, rehearsal rooms, restaurants, pubs, gyms and fitness clubs, schools, events, presentations, and conferences.
