SOWA Link.

SOWA lets you play unlimited speakers wirelessly together - live. We call our technology SOWA Link.

Set up as many speakers as you need without having to worry about cables.

SOWA Link runs on 2,4 GHz like Wifi and Bluetooth, but is nothing like its two siblings.

Sound quality is great, the battery will last for days, latency is ultra low, and the range is huge.

note: the frequency response reflects a SOWA tuned for flatness. The end product may differ slightly due to loudness and other processing.

Sound Pressure Level	101 dB at 1 meter.
Processing	Dedicated DSP and active crossover, effective protection circuits.
Stereo	Speakers can wirelessly play either left, right, or a mono sum of the stereo image.
Drivers	6" woofer (40 W) and a compact large surround (30W) Frequency range from ~75 Hz to 20 kHz \pm 3 dB.
	The SOWA speaker is tuned to perfection by skilled audio professionals at the Bang & Olufsen test facilities and Soundhub Denmark.
SOWA Link	Connect as many speakers as you need.
	2,4 GHz proprietary wireless audio transmission – not wifi, not Bluetooth, but free ISM band in the whole world.
	Extremely resilient towards wifi and bluetooth signals.
	+200 m range (line of sight).
	Low latency (15 ms).
	48 kHz 16 bit stereo stream.
Power & Playtime	Battery energy capacity: 97 Wh.
	+25 hours of playtime (on 80% volume).
	External power supply AC100-240v in 50/60 Hz DC26V 2A out.
	Ultra efficient, Danish designed digital amplification.
SOWA Pro Controls	Control local volumes on each speaker.
	Adjust delay setting on each speaker (0 – 290 milliseconds \approx 96 meters).
	Three XLR presets: no processing (flat), handheld mic, and Headset.
