

NOVOX NVX 12

ACTIVE LINEAR SET

The new design and modern look distinguishes the new series of Novox NVX columns. The new NVX 12 column is a proposal for everyone looking for an active "package" with many functions. Built-in mixer, bluetooth and bluetooth wireless system are just some of the features of the new proposal from NOVOX.

NVX 12 is an active speaker with 700 watts. It has a 12 "woofer and a 1" tweeter. On the rear panel we will find a mixer in which we will find 3 channels (2 x MIC / Line – COMBO-XLR / Jack input and 1 x AUX – small stereo jack). We also have EQ, Master Volume and Output available.

The most important feature of this column is certainly the bluetooth system. In addition to normal transmission, e.g. from a telephone to a column, it also has a wireless system that allows pairing one column with another. This gives you the ability to play music wirelessly on 2 columns simultaneously. This solution certainly gives many possibilities for various applications.

High power, good sound quality, bluetooth system, built-in mixer and value for money is a very good proposition for any event.

TECHNICAL SPECIFICATIONS

- ❑ Speakers – 12 "+1"
- ❑ Bandwidth – 55Hz-18kHz
- ❑ MAX SPL – 102 dB
- ❑ Power – 700 W
- ❑ Mixer – 2 x MIC / LINE, 1 x AUX, 1 x MIX OUT
- ❑ Bluetooth
- ❑ Bluetooth wireless
